The Super Multi-Purpose ABSORBENT

Instazorb instantly absorbs all kinds of liquids, of any viscosity, off any hard surface, leaving that surface clean and dry. This includes spills of chemical, mineral, petroleum, animal, and vegetable liquids. It has virtually unlimited uses as a dry absorbent that is safe in all applications. It is a fast, thorough, and easy way to absorb spills of liquids and semiliquids (such as heavy greases) on contact and turn them into a solid that can easily be swept away.

Instazorb is appropriately called a “super absorbent”, not only because of its high absorption capacity, but also because of its extraordinary versatility. It is “nonselect”, meaning it does not have a limited range of efficacy. Instazorb is not injurious to humans, animals, soil, concrete, asphalt, tile, or plants. It contains no reactive chemicals, is not toxic, flammable, or biodegradable, and is environmentally safe and friendly. Instazorb is also approved for use in food processing facilities. Instazorb is wholly processed from an inert, expanded volcanic mineral treated with a patented surfactant. Due to their structure, Instazorb particles provide a tremendous amount of surface area when compared to their weight. This structure allows for excellent surface tension, contributing to the exceptional absorption qualities of the product. In effect, Instazorb turns the spilled liquid into a solid that can be disposed of easily. Because it is lightweight and so simple to use, it dramatically reduces clean up costs, as well as the ever increasing costs of disposal.

*Crystalline silica may
cause cancers

- ISO 14001 v.2004: More than 50% of savings on disposal costs, thanks to it's light weight and great power of absorption.
- Instantaneous: No waiting! Pour, sweep, and discard!
- Savings: Decreases water and detergent usage. 1 bag of InstaZorb is worth 2 bags of regular absorbents.
- Light: An InstaZorb bag only weighs appx. 3kg for 30 liters instead of 20kg for a regular absorbent.
- Dries: Through it's composition, InstaZorb leaves your floors dry, clean, and with no slippery residue.
- Pollution-free: 100% natural, InstaZorb does not leach out the absorbed liquid and is itself totally inert.
- Safe: Greatly aids the pickup of liquids in glassware after breakages.
- Healthy: InstaZorb is a non-cancerous product, made of amorphous-silica, which does not cause silicosis (pulmonary infection) unlike other absorbents composed of clay and wood.
- Road compliant: Perfect usage on roads, through the French norm NF P98-190

**INSTAZORB ABSORBS
ANY LIQUID (WITH
THE EXCEPTION OF
HYDROFLUORIC ACID).
AND CAN BE USED ON:**

- OILS
- CHEMICAL PRODUCTS
- SOLVENTS
- PAINTS
- ENGINE FUEL
- HYDRAULIC OILS
- BRAKE FLUID
- GLYCOL
- ACIDS
- BASES
- POLYMERS
- GLUE
- HERBICIDE
- FOOD (SEMI-LIQUIDS)
- DRINKS
- ALL BODILY FLUIDS
